The influence of grinding on the flexural strength of zirconia ceramics is Strength and fracture of glass and ceramics. of Science and Technology

The fracture strength of glass may be increased

The fracture strength of glass may be increased by etching away a thin surface e layer. It is believed that the etching may alter the surface crack geometry (i.e

Tempered and plate glass fracture - veryst

This demonstration uses identically sized panes of plate and tempered glass to demonstrate the increased strength and granular fracture behavior of tempered glass.
